## Education

- 3WA – Master Lead Developer (Cybersecurity option), 2023
- DigitalCampus – Bachelor in Web Development, 2022
- IUT Montpellier – DUT in Computer Science, 2019–2021

## Professional Experience

### Web Developer – DEUXBRINS | Dec 2025

- Redesigned the existing Wix platform into a **custom e-commerce store** with **Stripe integration**, optimized for performance, SEO, bandwidth, and costs.
- Built a **secure partner platform** to streamline orders for collaborators.
- Developed a **lead generation strategy** for future marketing campaigns.
- Implemented **Microsoft Clarity** for advanced analytics: heatmaps, user flows, most visited products, and cart access tracking.
- Optimized UX and performance to **handle high-traffic** scenarios (featured on TV).

### Founder & Developer – BestFrame AI ([bestframe.pro](https://bestframe.pro)) | Oct 2025

- Designed and developed a **SaaS platform** to analyze videos and automatically extract the most relevant frames.
- Built a **dedicated backend in FastAPI (Python)** for video processing and AI model orchestration.
- Implemented **Microsoft Clarity** for user analytics and UX optimization.
- Deployed on a scalable **VPS** with serverless Edge Functions.
- Managed user authentication, roles, permissions, and RLS policies.

### **Front-End Developer Vue – Bluspark | February-April 2025 (3 months)**

- Integrated complex forms with dynamic state management
- Implementation according to provided UI and design, connected with backend APIs
- Implement robust front-end error handling and API integration

### **Front-End Developer Vue – Slym | July–December 2024 (6 months)**

- Iteration and continuous improvement of the Slym.co application
- Backend work using PHP Laravel and InertiaJS for routing
- Front-end development with Vue3 and Tailwind, managing app themes, animations
- Landing page integration [slym.co](https://slym.co)

### **Front-End Developer – U'RSELF | 2022–2023 (1 year)**

- Migrated applications from Vue 2 to Vue 3
- Implemented ViteJS and Quasar framework
- Automating Excel processes with AppScript

### **Fullstack Developer – MyCater | 2021–2022 (1 year)**

- Upgraded the Adonis framework, wrote automated tests, optimized performance
- Developed interactive dashboards and implemented 5+ new integrations

### **Web Development Intern – Groupama | Apr–Jun 2021 (3 months)**

- Designed and developed internal tools for G2S using Vue.js, TypeScript, with Storybook for UI components, Swagger and Postman

## **Technical Skills**
